

Bruno Giovanni Pereira

Guaruja, SP — Brazil | brunogp.corretor@gmail.com | +55 (13) 99124-8146
linkedin.com/in/beehgiovani/ | github.com/beehgiovani/

*Full-Stack Software Engineer specialized in **GIS / Geospatial Technology**, **Advanced Automation (OSINT / LegalTech)**, and **Native Mobile Development**. Proven track record building high-impact, production-ready systems — from GIS-powered real estate intelligence platforms to industrial-scale PWAs for major brands. Self-taught, product-minded, and driven by solving real-world problems end-to-end.*

Experience & Technical Achievements

Senior Consultant (Kotlin) | Soo Tech

Jan 2024 – Present

High-value Kotlin consulting for the Agilidade client via Soo Tech.

- Optimized critical performance modules in Kotlin, reducing processing latency.
- Developed new features and maintained codebase following agile methodologies for fast, high-quality delivery.
- Applied advanced Kotlin design patterns to ensure software scalability and maintainability.
- Collaborated closely with the product team to translate business requirements into precise technical specifications.

Founder & Lead Developer — GuaruGeo

2023 – Present

guarujainterativo.web.app

GIS intelligence platform for the real estate market on the coast of São Paulo, Brazil.

- Full-stack architecture: React, Node.js, Supabase (PostgreSQL + Realtime) and Firebase Hosting.
- Advanced GeoJSON visualization using Google Maps API and Overpass API; spatial indexing via RBush for high performance.
- OSINT engine for ownership identification, legal status lookup and data enrichment across entire city lots.
- Admin dashboard with real-time analytics, integrated CRM and automated legal certificate issuance.

Lead Developer — Cimed Experience cimedexperience.web.app

2024 – 2025

Industrial-scale PWA for Cimed, Brazil's #1 pharmaceutical consumer brand.

- Full stack: React 19, TypeScript, Vite, Framer Motion, Zustand, Supabase and Firebase.
- Social Hub with live leaderboards, gamified missions (Drive-to-Store), and AI assistant "Claud.ia".
- Video scraping pipeline; installable PWA with native-like experience on iOS and Android — no app stores needed.

Automation & Data Engineering Specialist

2021 – Present

High-performance data extraction and critical process automation (LegalTech / GovTech).

- **2-Stage Real Estate Scraper:** HTTP + Playwright pipeline with Tor multi-port IP rotation and a custom-trained CAPTCHA OCR model (PyTorch / CRNN).
- **Certibot (LegalTech):** Bot for automated legal certificate issuance across 6+ government portals (TRF3, TJSP, TST, TRT2, Receita Federal, CJF).
- **GIS Data Mining:** Automated extraction and normalization of zoning polygons (urban planning PDFs/CAD files) into structured geospatial databases.

Native Android Developer

2021 – 2023

High-quality mobile solutions in Kotlin with AI and hardware integrations.

- **NidusCare:** MVVM + Hilt + Coroutines; Google Gemini Vision AI for medication prescription scanning via photo; Firebase backend.
- **MarketPoster:** ML-powered background removal for retail design; Bluetooth thermal printing integration.
- **PharmaFlow:** Pharmacy delivery ecosystem with native Android app and React/Firebase admin dashboard.

Technical Skills

Languages: JavaScript (React / Node.js), TypeScript, Python, Kotlin (Jetpack Compose), SQL.

Cloud & Infra: Supabase, Firebase, Docker, PostgreSQL, Linux Server, DigitalOcean.

Frontend: React 19, Vite, Framer Motion, Zustand, Leaflet.js, Google Maps API.

Automation / AI: PyTorch (CRNN OCR), Playwright, ddddocr, Tor, Gemini API, Vertex AI.

Specialties: OSINT, GIS, LegalTech, PWA, Anti-Bot Scraping, Computer Vision, Gamification.

Education

- Bachelor's Degree in Pharmacy (In progress) — Foundation for HealthTech solutions.

- Software Development — Self-taught with advanced specializations in Full-Stack and Data Engineering.
